

AFI-USB HF Noise Blocker & Reclocker

- Blocks HF noise from computer CPU into DSP / DAC / PowerBox
- Most cost-effective measure to improve digital source quality
- **Signal and sample rate are transmitted on three independent optical pathways**
- **Complete signal re-clocking, not just PLL architecture**
- **Avoids typical jitter of optical TOSLINK connections**
- IN: USB cable from your computer
- OUT: High quality Neutrik EtherCON© shielded RJ45 connection
- Adapts by a RJ45-dig.RCA/XLR converter **just at the entry point**
- Signal routing: Computer ► AFI-USB ► PowerBox or DAC
- Available worldwide from www.magicLX521.com
